

Problem Statement

Introduction:

Education is rapidly evolving with the integration of Artificial Intelligence (AI). Students often face challenges in understanding complex topics, preparing for examinations, and finding reliable learning resources. An intelligent educational assistant can simplify learning by providing instant guidance and personalized support.

Problem Statement

Students encounter several difficulties during their learning process:

- Difficulty understanding complex concepts.
- Time-consuming note summarization.
- Lack of personalized learning recommendations.
- Manual quiz preparation requires significant effort.
- Switching between multiple learning platforms.

Proposed Solution

EduGenie is an AI-powered educational assistant that integrates question answering, concept explanation, quiz generation, learning path recommendations, and PDF summarization into a single application using Google Gemini AI.

Objectives

- Develop an AI-powered educational assistant.
- Provide accurate answers to user queries.
- Generate quizzes automatically.
- Summarize educational documents.
- Recommend personalized learning paths.

Expected Outcome

The application will improve learning efficiency, reduce study time, and provide an engaging user experience.
