

Project Development

Introduction

The EduGenie application was developed using a modular architecture consisting of a responsive frontend, FastAPI backend, and Google Gemini API integration.

Development Process

- Requirement gathering
- UI design
- Backend implementation
- AI integration
- Feature enhancement
- Testing
- Documentation
- Deployment

Frontend Development

The frontend was built using HTML, CSS, and JavaScript to provide an interactive and responsive interface.

Backend Development

FastAPI was used to develop REST APIs for handling user requests and communicating with the AI modules.

AI Integration

Google Gemini API was integrated to generate intelligent responses for all educational tasks.
