

Requirement_Analysis

Introduction

Requirement analysis identifies all the functional and non-functional needs of the EduGenie application before development.

Objectives

- Develop an AI-powered educational assistant.
- Improve learning efficiency.
- Generate intelligent educational content.
- Provide personalized learning.

Scope

EduGenie allows users to:

- Ask educational questions.
- Upload PDFs for summarization.
- Generate quizzes.
- Explain concepts.
- Receive learning paths.
- Use voice input.
- Listen to AI responses.

Stakeholders

- Students
- Teachers
- Self Learners
- Educational Institutions

Constraints

- Internet connection required.
- Gemini API quota limitations.
- Browser microphone permissions needed for voice input.
